Slimline Lithium Batteries

Slimline lithium batteries are a space-saving version of LiFePO4 batteries designed to fit into narrow or hidden compartments. They provide the same high performance as a standard lithium battery but in a compact, easy-to-mount form.

Perfect for:

- 4WD setups with limited storage
- Campervans and caravans
- Marine and boating systems
- Under-seat and behind-panel installations

Key Benefits

Why choose Muller Energy slimline lithium batteries?

Compact Design

Ideal for tight
installation spaces

Fast Charging

spend less time
plugged in
